## DESCRIPTIONS

- Event dates begin at 6am CST (12 UTC) and end at 5:59am CST (11:59 UTC) the following day.
- Events are only included if  $\geq 0.75$ " hail was detected within 3 miles of the location.
- Events included from January 1, 2011 to January 6, 2025.
- Hail sizes less than 0.75" are unavailable.
- "-" indicates no hail found.
- Hail size table is shaded based on hail size in that cell.
- It's very common for Reported Date of Loss (RDOL) to be incorrect. The Suggested Date of Loss (SDOL) is identified based on RDOL. The SDOL process first checks for  $>1.00$ " at location on the RDOL. If no, then SDOL searches for the first date of hail  $>1.00$ " at location for 45 days after RDOL. If no, then SDOL searches for the first date of hail  $>1.00$ " at location before RDOL. Finally, if no, then SDOL searches for the first date of hail  $>1.00$ " at location after RDOL up to the most-recent date covered by this report.
